emporia

Emporia Vue
Home Energy Monitor

Vue tracks your electrical usage and offers **savings opportunities**. It's like a fitness tracker for your home's energy.

See Exactly Where Your Money Goes

No more mystery bills. The Vue breaks down real-time usage by circuit: HVAC, EV, washer, and more.

Save 10% or More Every Month

Knowing where your energy goes changes behavior. Pair the Vue with Emporia smart devices and it saves automatically.

Alerts Before Problems Get Expensive

Oven left on? Sump pump running non-stop? The Vue sends alerts before a small issue becomes a big repair bill.

Get More From Your Solar Panels

The Vue catches excess solar and automatically redirects it to your EV or appliances, not back to the grid.

Automates Energy Savings for You

Connect smart plugs, a thermostat, or your Emporia charger and the Vue shifts usage to cheaper hours instantly.

Check In From Anywhere

The free Emporia app gives you real-time data, alerts, and controls at your fingertips, 24/7, from wherever you are.

"You wouldn't ignore your bank account — so why ignore your energy bill? The Vue tells you exactly what's using electricity, catches things you'd never notice, and works in the background to cut your bill every single month."
